Subject: [WEBINAR] Cost-Effective Pretreatment of Surface Water Intake
Date: Wednesday, August 15, 2018 7:16:17 AM

[External Email - Be careful! DO NOT open attachments or click links from unknown senders or unexpected email.]

Why pay triple for river water treatment when you don't have to?

Click here to register.

On Thursday, September 13, you are invited to join Veolia

Water Technologies to learn how disc filtration technologies can **reduce pretreatment costs of surface water intake** for service and cooling water systems.

Thursday - September 13, 2018
2:00 to 2:45 PM (EDT)
Cost: Free

This webinar will provide information on the Discfilter technology, its operation and maintenance, and case studies of successful installations.

There will be time at the end to answer your specific questions as well!

Featured Speaker

Bridget Finnegan
Process Engineer
Veolia Water Technologies

Bridget Finnegan is a process engineer at Veolia Water Technologies' Industrial Projects Group in Pittsburgh, PA. She earned her BS in Chemical Engineering at Penn State University and has worked for Veolia for four years. Bridget specializes in biological and Discfilter design and has been involved in some of Veolia's highest-visibility projects.

"Veolia's Hydrotech Discfilters can be applied to treat river water for Cooling Tower Make-up, Service Water, and Demineralization Pretreatment"
